## 1. Introduction

The Wireless MBUS **RFM-RX3** Receiver is an USB device that allows **data collection** from BMeters WMBus based family products. The **RFM-RX3** receiver is designed to be used with the B METERS' configuration and acquire PC Tool for the transmission of water and heat costs.

## 2. System requirements

- 1 free USB port
- CPU: Dual Core x86/x64 bit 1.5 GHz (>2GHz recommended)
- RAM 4GB (6GB recommended)
- 150 MB of free disk space (2GB recommended) for the application
- 1 GB for database and readings (variable depending on the number of devices to be received)

## 3. Installation

Insert the receiver, which does not require drivers to be installed, into a **free USB port** on your PC. Refer to the **BMetering software** manual for use, which can be downloaded free of charge from the website <https://www.bmeters.com/en/download/>
